

Sound Teeth Guarantee Endorsement

As an accounting practice of nearly 20 years we have extensive experience of providing accounting and taxation services to a wide range of businesses including dental practices.

The work we do provides us with a detailed knowledge of the challenges dental practices face not only in maintaining existing profitability, but also in the search for ways to increase and then sustain additional profit via increased patient throughput.

We've seen that much of the effort to increase profitability means incurring the capital outlays and direct costs necessary to achieve this and this is hugely expensive and not always easy to do.

The introduction of the Sound Teeth Guarantee is a very exciting opportunity for dental practices not only to drive up the profits of the business, but allows them to do so without having to take on the investment often needed for expanding a practice and its profitability.

From our point of view, implementation of the guarantee programme in a dental practice is a complete win-win situation. The income you receive from each guarantee issuance is set and you have the knowledge that any costs of carrying out dental work under the programme are fully indemnified.

This is why we are extremely happy to provide our full endorsement of the Sound Teeth Guarantee programme and recommend that every practice adopt it.
